

SnyderCare® Platinum

Fertilizer & Weed Control Program
8 Total Services

- RO1- Early Spring- March/April, Granular Crabgrass Preventative
- RO2- Spring- May/June, Fertilizer and Weed Control
- RO3- Early Summer- July, Granular Fertilizer
- GRUB- Early Summer- July, Granular- Must Water In.
- RO4- Summer- August, Granular Fertilizer
- RO5- Fall- September, Fertilizer and Weed Control
- RO6- Winterizer- October, Granular Fertilizer
- CORE AERATION- October/November

Grub Preventative: Your lawn receives this application to protect it against damaging annual white grubs.

Core Aeration: This procedure greatly improves the flow of oxygen, water, and fertilizer into the root zone.

Fertilization: Your lawn receives 6 feedings throughout the growing season.

Crabgrass Prevention: We treat in early spring to minimize the germination and emergence of crabgrass.

Broadleaf Weeds: In mid spring, we clear out dandelions and more than 50 other common lawn weeds throughout the growing season.

Lawn Insects: (surface feeding) In the summer, we monitor your lawn and treat as needed for a wide variety of surface-feeding insects.
